

# Blockchain Services

Web3 Solutions to innovate beyond

# About us

We are a **blockchain technology company** providing **web3 solutions** for businesses that want to evolve using cutting-edge blockchain solutions and for Web3 projects that want an upgrade through our multi-chain extensive experience.

# Values

we bring to the table

## AGILE

Purpose built solutions with high adaptability to make **boundless potential** reachable

## ACTUAL

Everything we build is based on the actual **needs and objectives** of our partners

## CONTEXTUAL

Advanced Web3 solutions adapted to your **business' market context** to target efficiency

# Competitive Edge of Web3 Solutions

## Stay ahead with blockchain

We provide context-driven solutions across multi-chain platforms

## Decentralized Solutions

Benefit from our blockchain expertise for seamless Web3 solutions

## Upgrade to Web3 Solutions

We provide context-driven solutions across multi-chain platforms

# Blockchains

we built on

The Multiversx logo, consisting of a stylized 'X' shape formed by two overlapping, slightly offset rectangular bars.

Multiversx

The Solana logo, featuring three horizontal, slightly curved bars that resemble a stylized 'S' or a set of wings.

Solana

The Ethereum logo, a diamond shape with a smaller diamond inside, representing the Ether symbol.

Ethereum

The Polygon logo, a stylized 'P' shape formed by two overlapping hexagonal shapes.

Polygon

The Aptos logo, a stylized 'A' shape formed by two overlapping, slightly curved bars.

Aptos

The Algorand logo, a stylized 'A' shape formed by two overlapping, slightly curved bars.

Algorand

The Cardano logo, a cluster of small dots arranged in a roughly circular pattern, representing the ADA symbol.

Cardano

The BNB logo, a stylized 'B' shape formed by two overlapping, slightly curved bars.

BNB

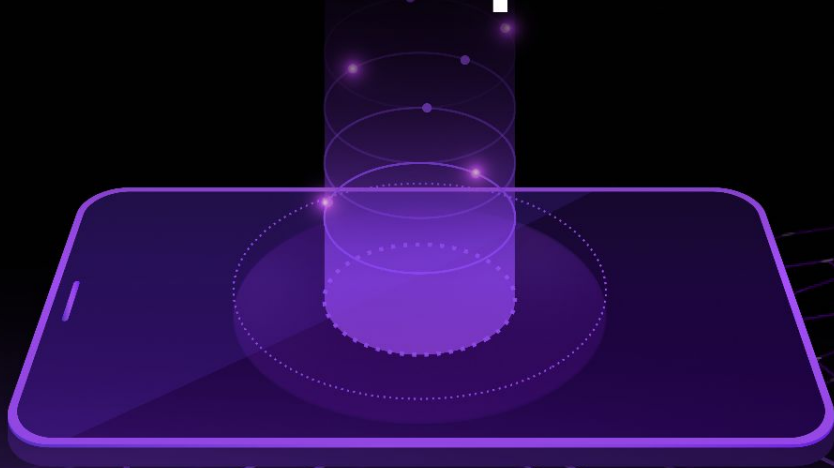

# dApp Development

A stylized illustration of a smartphone with a glowing purple and blue interface. The interface shows a central glowing cylinder with horizontal rings and a dotted circular base, all set against a background of a glowing grid pattern.

Possibly the peak of software development, decentralized apps (dApps) offer security, transparency, immutability, new gen incentivizing and automated agreement execution.

It starts off with designing, coding and testing and it is based on a bulletproof Smart Contract that enables the app to seamlessly interact with the blockchain network. We have long overcome the specific UX/UI problems associated with dApps, using our extensive experience in multiple blockchains and for different industries.

SOLUTIONS

# Our Portfolio

A decorative background featuring a purple grid pattern that forms a wavy, undulating surface. A semi-transparent purple rectangular block is positioned in the center, partially overlapping the grid. The overall aesthetic is futuristic and digital.

# WebitPay

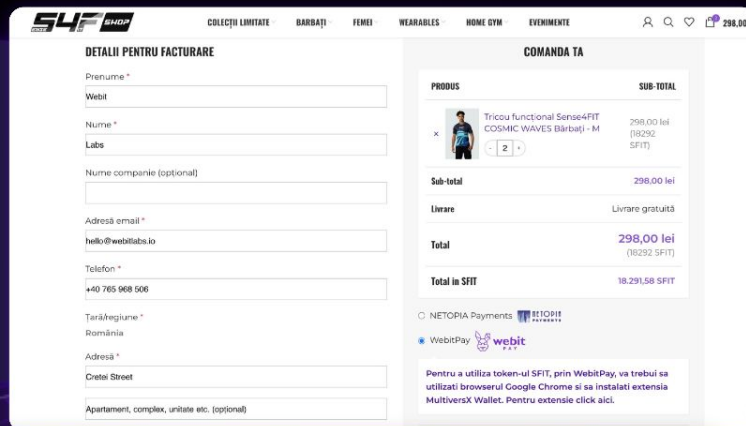

WebitPay is a customer to merchant crypto payments solution which can be integrated into any e-commerce platform and that can be operated through a very intuitive dashboard for merchants to keep track of activity and claim the income from the smart contract.

# SuperVictor

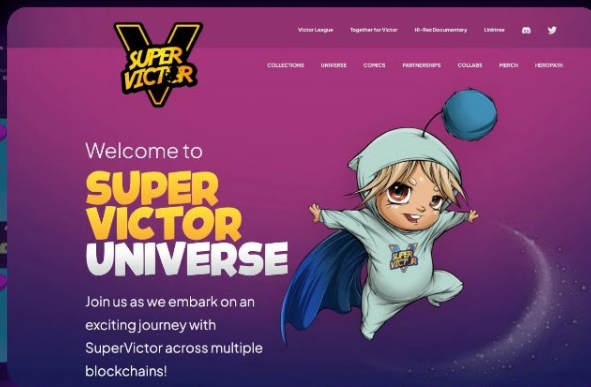

Harnessing the power of MultiversX's blockchain, our minting smart contract empowers the launch of diverse NFT collections. Crafted to facilitate philanthropic initiatives, our dApp ensures seamless interactions, allowing participants to support noble causes effortlessly. Prioritizing intuitive UI/UX, we believe technology should amplify, not obstruct, charitable actions.

dApp Development

# Solluminati

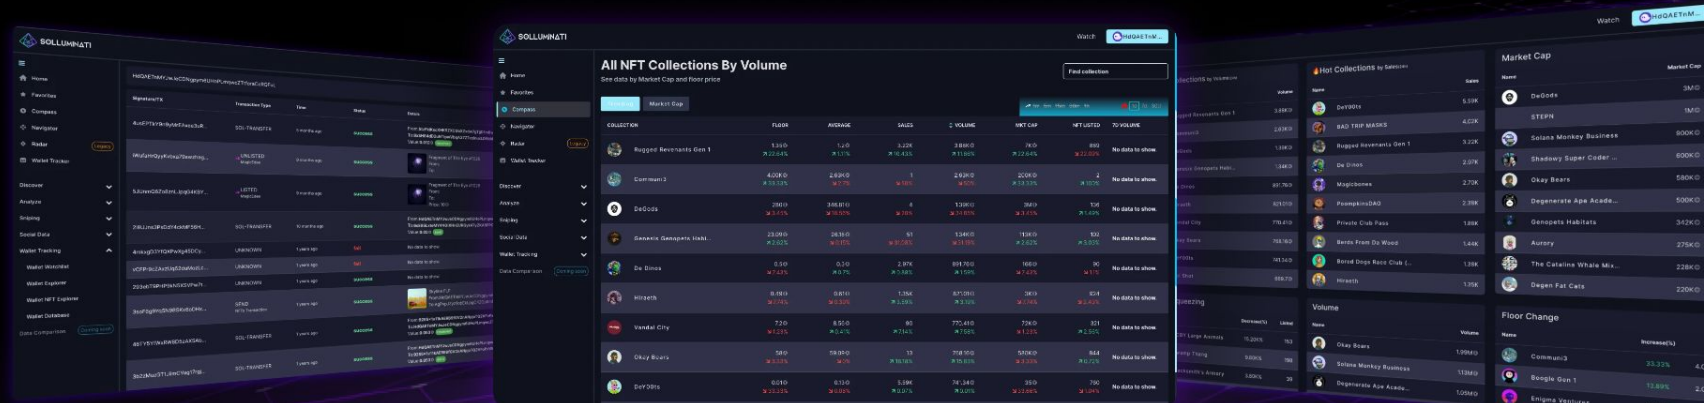

Delivered as a B2B solution to projects across the Solana blockchain which can be easily integrated and highly configurable in regards to staking rules, rewards, reward type, and claiming cycle. Providing exclusive utility for NFT holders and a revenue stream for both the NFT holders that staked their assets and for the project's treasury that supports the DAO.

Development

# Ethernity Cloud

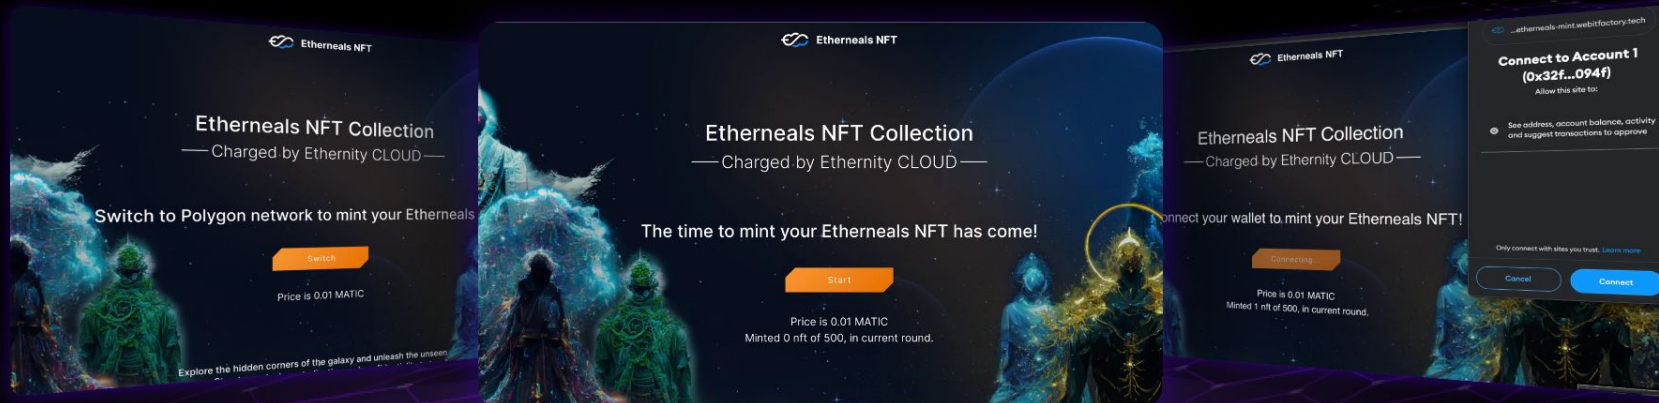

Built for the NFT minting process with a ChainLink VRF integration for a verifiable random function and a dApp to translate and deliver the complex process in a decluttered and easy way for the users to mint. Perfected to ensure NFT data integrity and accuracy because the NFT metadata determines specific advantages, perks and boosts within the Cloud Service. The smart contract's advanced features can be easily operated based on the provided User Guide.
