

Blockchain Services

Web3 Solutions to innovate beyond

About us

We are a **blockchain technology company** providing **web3 solutions** for businesses that want to evolve using cutting-edge blockchain solutions and for Web3 projects that want an upgrade through our multi-chain extensive experience.

Values

we bring to the table

AGILE

Purpose built solutions with high adaptability to make **boundless potential** reachable

ACTUAL

Everything we build is based on the actual **needs and objectives** of our partners

CONTEXTUAL

Advanced Web3 solutions adapted to your **business' market context** to target efficiency

Smart Contract Development

The foundation, the backbone of decentralization and transparency, the “web3” in any project - Smart Contracts We have mastered the art of Smart Contract development in many different blockchain networks and business contexts, enabling our partners to reach their goals.

This involves identifying the contract requirements, designing the contract, writing the contract code, followed by testing, reviewing, security auditing in order for everything to be perfect before the smart contract is deployed on the mainnet.

On chain & Off-chain analytics

A stylized illustration in shades of purple and blue. It features a magnifying glass on the left, a glowing lightbulb in the center, and a circular progress indicator or loading spinner on the right. The background is a dark purple grid pattern.

Transaction history, blockchain interactions, holder information, NFT collection data, hashrates - all this publicly available blockchain data can be harnessed into powerful tools that empower informed decision making through cutting-edge data analytics.

On-chain & off-chain analytics can work in a synergy that enables you to get insights of the market sentiment, your user interests and behavior, to discover the next big Web3 opportunity and to always make informed decisions and investments.

On chain & Off-chain analytics

A large graphic on the left side of the page. It features a magnifying glass with a glowing handle, positioned over a glowing lightbulb. The lightbulb has a glowing filament and is surrounded by a circular glow. Below the lightbulb is a glowing circular icon with a central dot.

dApp Development

Possibly the peak of software development, decentralized apps (dApps) offer security, transparency, immutability, new gen incentivizing and automated agreement execution.

It starts off with designing, coding and testing and it is based on a bulletproof Smart Contract that enables the app to seamlessly interact with the blockchain network. We have long overcome the specific UX/UI problems associated with dApps, using our extensive experience in multiple blockchains and for different industries.

Web3 Enhancements

An abstract digital graphic in shades of purple and blue. It features a glowing blue book at the bottom left, with lines extending upwards to connect various icons: a speech bubble, a musical note, and a dollar sign. The background is a dark purple grid pattern.

Ownership and control over data, decentralization, security, privacy and interoperability - all these Web3 benefits would mean nothing if we were not here to deliver them through proven tools and development.

Let's team up and deliver the best Web3 UX enhancements through community platforms add-ons, gamification solutions, DAOs (Decentralized Autonomous Organizations) & Governance backed by scalable smart contracts, entire ecosystems for users to dive in and third party integrations to extend your reach and enable true interoperability.

Community Building & Engagement

A large, semi-transparent purple circle is positioned behind the main title. To the left of this circle, there are several white icons: three horizontal lines, two overlapping speech bubbles, and two stylized human figures (one larger, one smaller) representing a community or group.

Redefining community engagement, Web3 solutions utilize blockchain technology to maximize user interaction and foster active participation. Key features like NFT-based loyalty schemes and DAO Governance tools drive involvement, while interactive rewards, customizable NFTs, and dynamic referral programs deepen user engagement.

Anchored in robust blockchain and innovative dApp development, these cutting-edge Web3 solutions facilitate continuous engagement, thereby revolutionizing the concept of community building in the digital era.

Benefits of blockchain in Decentralized Cloud Computing

We develop NFT collections that seamlessly integrate with the Decentralised Cloud Computing Solution, offering unique benefits to NFT holders based on token attributes. This innovative fusion of art and technology delivers tailored cloud computing experiences.

Benefits of blockchain in Wellness and Fitness

We bridged the gap between wellness and Web3 through a dynamic project that disrupts the fitness industry based on gamification and incentives. Integrating blockchain technology, the fitness app enables Fit2Earn features, where workouts turn into rewards. The ecosystem, powered by smart contracts, offers global challenges, NFT upgrades, and token incentives, with benefits tied to NFT ownership.

Benefits of blockchain for Events & Festivals

Integrating Web3 technologies into the Events & Festivals sector, we've innovatively redefined and enhanced customer engagement. By coupling NFTs with real-life benefits, we've enabled validation of ownership and asset location tracking. This transformative approach allows users to convert Web3 benefits into tangible perks, such as event access and merchandise discounts, promoting year-round engagement and generating new revenue streams. The infusion of blockchain technology thus expands audience reach and enriches the event experience.

Benefits of blockchain in Art & Creativity

Leveraging Web3 solutions, we've pioneered an advanced NFT marketplace, fusing creativity and practicality. By tokenizing unique digital art pieces, we've ensured artists' rights protection and facilitated direct sales, promoting artist-buyer relations. With comprehensive market data, we provide users an immersive and informative experience, while blockchain-driven models introduce shared ownership and patronage systems, transforming the art world.

Benefits of blockchain in Finance

Our blockchain advancements in finance include a unified Crypto Asset Manager for comprehensive asset tracking and a crypto statistical platform serving both DEX and CEX, promoting cross-chain and finance-DeFi interoperability. We've empowered e-commerce with a user-friendly Web3 Payments API for secure, transparent crypto transactions. Furthermore, our contributions to the NFT space include high-capacity marketplaces supporting asset tokenization and providing insightful data for decision-making.

Benefits of blockchain in

Blockchain SaaS

We've explored and perfected Blockchain SaaS practices and pushed them forward to discover utility. Our developments encompass an easy-to-use staking platform for NFT projects, comprehensive wallet tracking and a blockchain-agnostic asset management application for all crypto and NFT assets. We've introduced a user-friendly DAO tool suite for streamlined NFT project management and a crypto statistics platform for insightful, real-time market data aggregation.

Benefits of blockchain in Gaming

Our contributions to the gaming industry span various fronts. We've facilitated user-customizable NFTs, enabling gamers to enhance their in-game experience. Our intuitive staking platform incentivizes asset engagement with daily token rewards and in order to add tangible value to these digital assets, we've developed an exchange platform for the conversion of proprietary tokens into cryptocurrency.
